SUSE Linux Enterprise Server

Physical infrastructure: Server, Switches, Storage

Partnership Milestones

2006

Microsoft and SUSE announce interoperability agreement.

SUSE offers first Enterprise virtualization technology integration for Linux (Xen).

2010

Microsoft and SUSE build joint customers using SUSE Linux Enterprise Server to over 1000

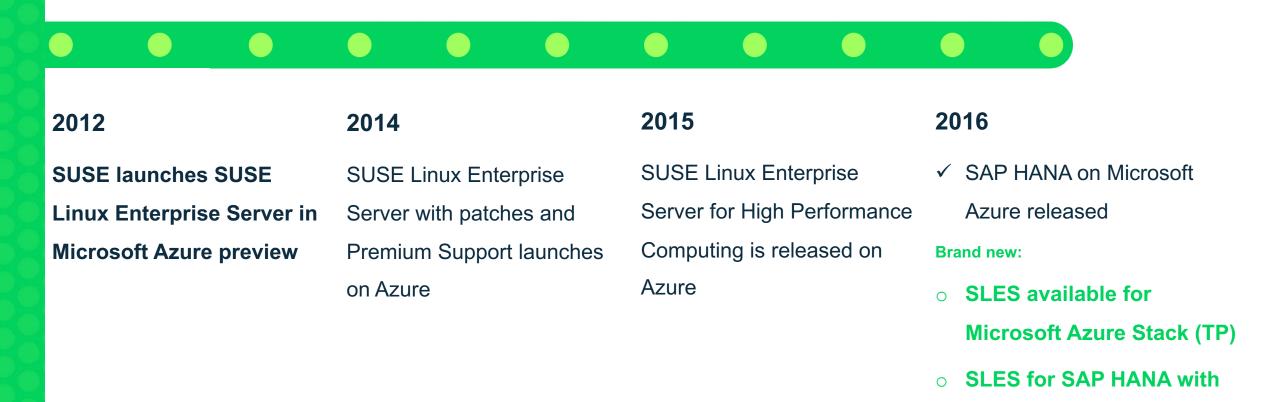

2012

SUSE and Microsoft release
SUSE Manager Management
Pack for Microsoft System
Center

Partnership Milestones

HA Extension

Hardened, Secure, Reliable Enterprise Linux on Microsoft Azure

Guaranteed service levels and seamless support directly from SUSE engineers

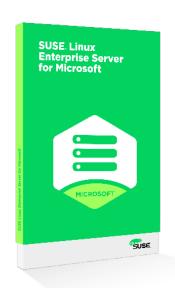

Available on demand or through existing Enterprise Agreements

Solutions built for security and scale:

- SUSE Linux Enterprise Server HPC optimized for performance with Linux RDMA drivers using Microsoft Infiniband
- SUSE Linux Enterprise Server for SAP Applications available on Azure on Large Instances for high performance, SAP HANA production workloads
- SUSE Manager reduces complexity of managing on-premise, private network, and Linux on public cloud from a single pane of glass

SUSE Open Source Solutions on Azure and Azure Stack

Enterprise Open Source Solutions Optimized for Azure

SUSE Linux Enterprise Server - Azure

SUSE Linux Enterprise Server for HPC

SUSE Linux Enterprise Server for SAP Applications

SUSE Manager

Enterprise Open Source Solutions Optimized for Azure

On-demand with Priority Support Available

Optimized for HPC with RDMA Driver support for use over Infiniband

The Leading OS for SAP with a High Availability extension on purpose-built Azure infrastructure

Manage your Linux distributions across physical, virtual, and cloud all from a centralized console (also available on Systems Center)

Subscription offerings and support

Buying Options

Microsoft Enterprise Agreement

SUSE Supports Linux

Simplifying Hybrit IT with SUSE Manager

SUSE Manager on Microsoft Azure

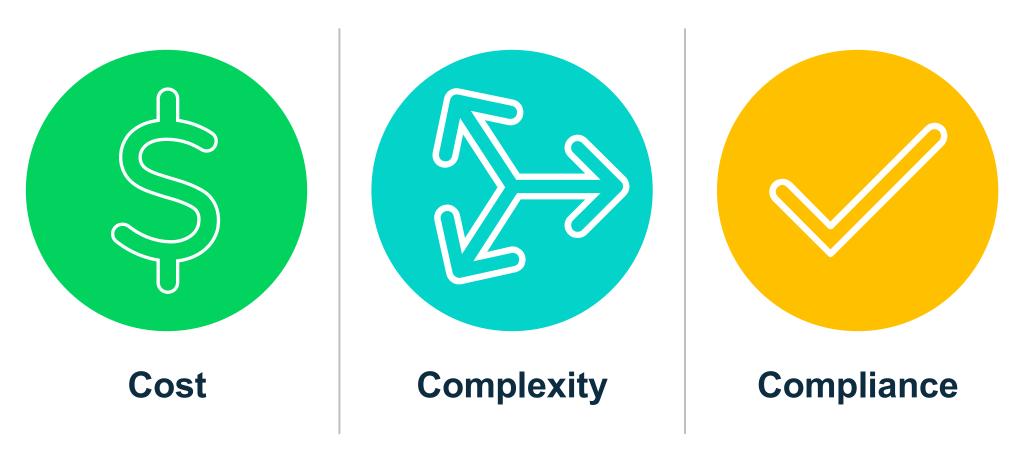

Reduce complexity and regain control, ensuring compliance and optimizing operations all while reducing costs.

- Reduce complexity and regain control of IT assets
- Ensure compliance with internal security policies and external regulations
- Optimize operations while reducing costs
- Available pack to integrate into Microsoft Systems Center

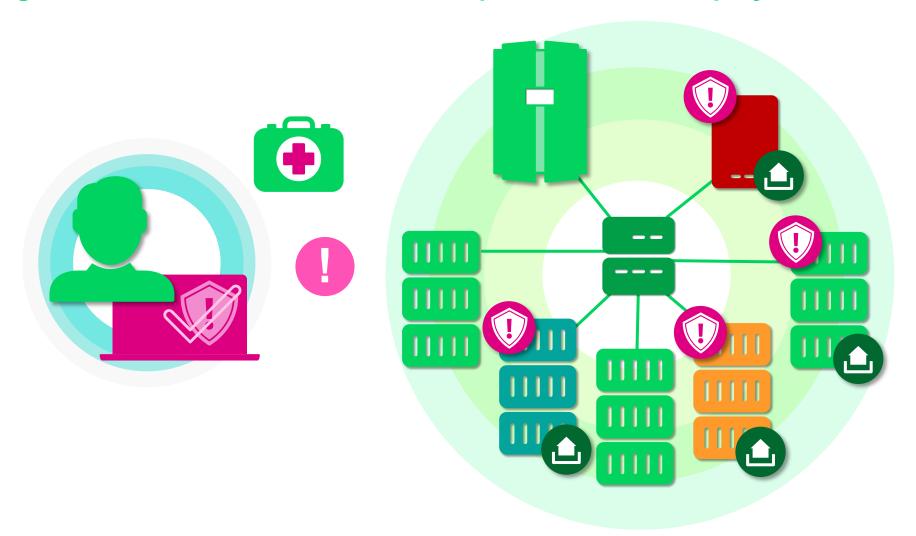

SUSE Manager: IT Transformation Challenge

"Transform your approach to infrastructure to enable the business to capitalize on new innovations and data."

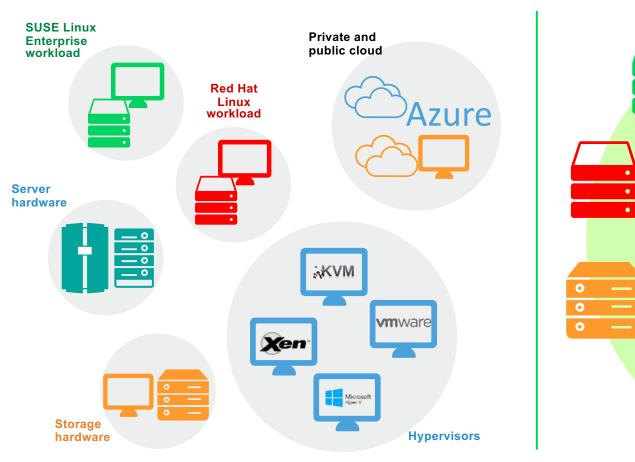

Optimize Operations and Reduce Costs

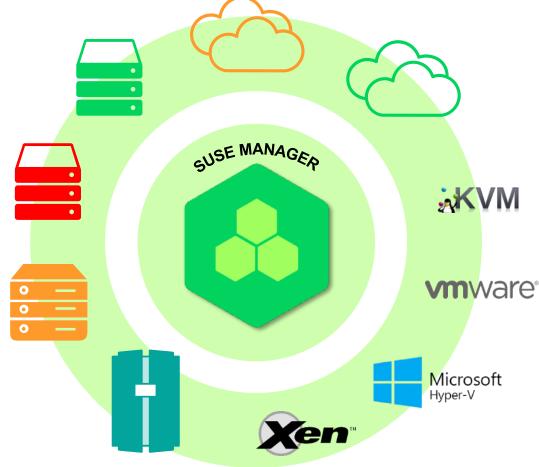

Enabling IT administrators to automate their Linux server provisioning, patching and configuration for faster, consistent and repeatable server deployments

Reduce Complexity and Regain Control of Your IT Assets

Using a single tool to manage Linux systems across a variety of hardware architectures, hypervisors and cloud platforms

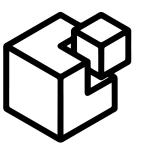

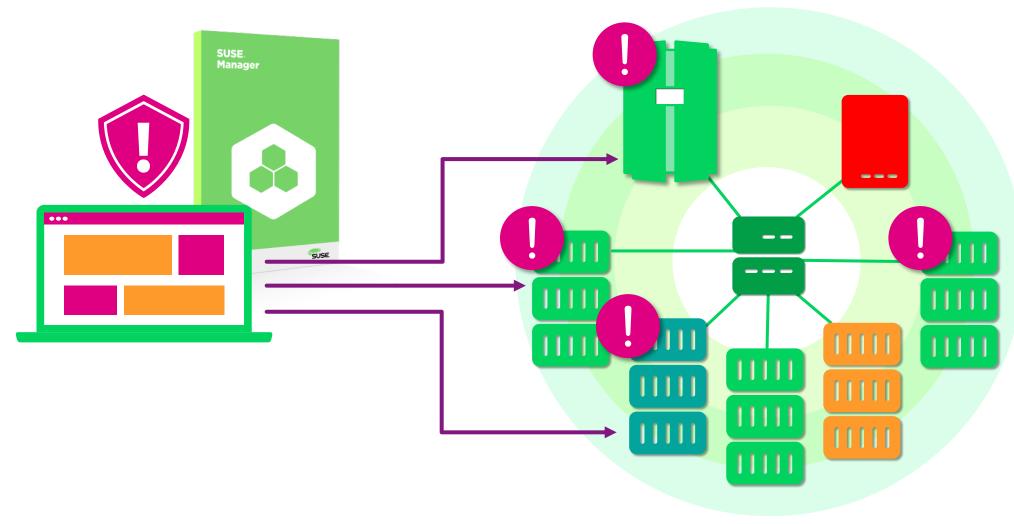

Ensure Compliance

With internal security policies and external regulations with automated monitoring, tracking, auditing and reporting

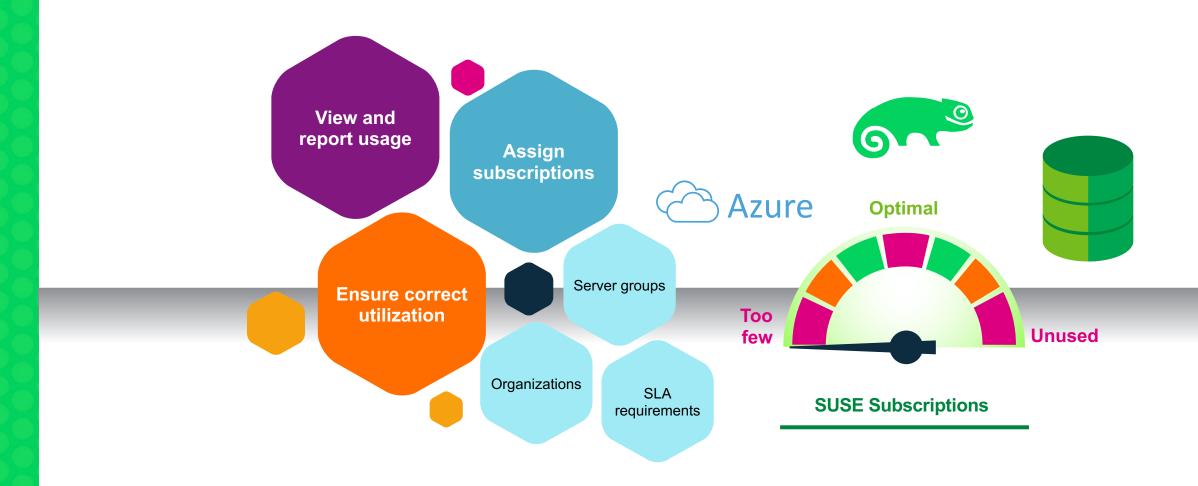

Monitor Configuration Compliance Based on Salt

Optimize SUSE Subscription Usage in Complex Infrastructures

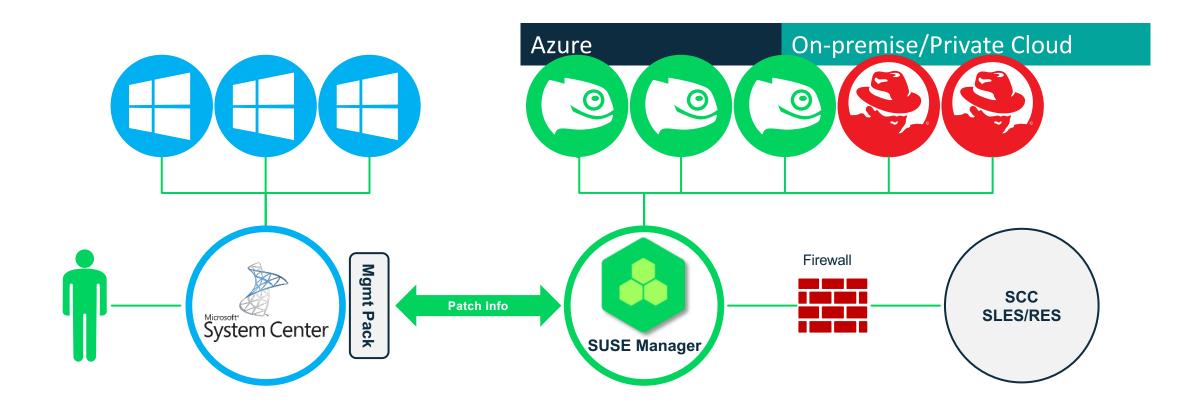

Mixed Windows & Linux IT?

SUSE Manager Management Pack for Microsoft Systems Center

- Patch your SUSE and Red Hat Linux servers
- Check Linux servers for health and update status
- Schedule maintenance window to run updates
- Compliance reports on all Linux servers in datacenter

How it works?

- Works with System Center Ops Manager
- · Requires installed SUSE Manager
